## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims(in part) 1-3,21,25-37, drawn to compounds, composition, a method of use, and first recited process of making generic Formula I ( = G1-CH2-O-CO-N-G2), wherein A,G1,G2 all are non-heterocycle, classified in classes 558-585, subclasses various depending on the nature of variables.
  - II. Claims(in part)1-12,22-37, drawn to compounds, composition, a method of use, and first recited process of making generic Formula I ( = G1-CH2-O-CO-N-G2), wherein A = Aryl, G1 = Benzofuran; G2 = Non-heterocyclic, classified in class 549, subclasses various depending on the nature of variables.
  - III. Claims(in part) 1-15,29-37, drawn to compounds, composition, a method of use, and first recited process of making generic Formula I ( = G1-CH2-O-CO-N-G2), A = Pyridine; G1 = Benzofuran; G2 = Non-heterocycle, classified in class 546, subclasses various depending on the nature of variables.
  - IV. Claims(in part)1-3,5-16,17,29-37, drawn to compounds, composition, a method of use, and first recited process of making generic Formula I ( = G1-CH2-O-CO-N-G2), A = Pyrimidine; G1 = Benzofuran; G2 = Non-

heterocycle, classified in class 544, subclasses various depending on the nature of variables depending on the nature of variables.

- V. Claims, 1-4, 18-20, 29-38, drawn to compounds not included in above Groups I-IV, classified in various classes, subclasses various depending on the nature of the variables. If this group is elected, further restriction will be required as there are many unknowns.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I-V are related as process of making and process of using the product.

The use as claimed cannot be practiced with a materially different product. Since the product is not allowable, restriction is proper between said method of making and method of using. The product claim will be examined along with the elected invention (MPEP § 806.05(i)).

The groups as presented above, are distinct inventions, each from the other because of the following reasons: The compounds of Groups I-V are drawn to:

- (1). Structurally diverse compounds that are made and used independently of each other;
- (2). Compounds are separately classified;
- (3). Classes will require separate literature searches;
- (4). Compounds are not art recognized equivalents, and additionally,
- (5). The groups lack unity of invention (see MPEP 803.02).

Based on above stated data i.e. (1) - (5), claim 1 also lacks unity of invention.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1624

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II-V, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. Claims 1,30,31, 37 are generic to a plurality of disclosed patentably distinct species comprising : when G1 = Phenyl; When G1 = benzofuran-Phenyl/aryl; when G1 = Benzofuran-pyridien; When G1 = Benzofuran-pyrimidine; when G1 = Benzofuran-pyrimidine; when G1 = Benzofuran-thienyl. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

7. A telephone call was made to Dr. R. Peries on 8/19/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1624

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
